In the Abstract:

Method for fabricating a spacer structure

The invention relates to aA method for fabricating a spacer structure_ī comprising the steps of includes: forming a gate insulation layer (2)-having a gate deposition-inhibiting layer-(2A), a gate layer (3)-and a covering deposition-inhibiting layer (4)-on a semiconductor substrate-(1), and patterning the gate layer (3)-and the covering deposition-inhibiting layer (4)-in order to form gate stacks-(G), a. An insulation layer (6) being deposited selectively using the deposition-inhibiting layers, thereby (2A, 4) for the purpose of permitting highly accurate formation of a-the spacer structure.
